

COMPANY PROFILE

SILICON TECHNOLOGIES

Technology Infrastructure Consultation,
Integration & Support.

Providing Next Generation Technology Solutions.

**DATA CENTER DESIGN, CONSULTANCY
& TURNKEY SOLUTIONS**

INDUSTRIAL AUTOMATION

POWER SOLUTIONS

**ENTERPRISE COMPUTING INFRASTRUCTURE
/ STORAGE**

VIRTUALIZATION / HCI SOLUTIONS

VIDEO WALL SOLUTIONS

**NETWORK INFRASTRUCTURE
& SECURITY SOLUTIONS**

SECURITY SURVEILLANCE

VIDEO CONFERENCING SOLUTIONS

**MANAGED SERVICES
& SERVICE LEVEL AGREEMENT**

About Us

SILICON TECHNOLOGIES, one of the leading ICT Organization engaged in addressing the needs of the Information Technology and Industrial Automation. Working with a firm conviction and determination for the advancement of IT Industry by joining hands with the leading global partners.

MISSION

Foster Technological Innovation,
Adaptation & Deployment

VISION

Persuing Excellence in
Infrastructure Transformation

VALUES

Integrity, Customer Satisfaction,
Continual Improvement,
Transparency, Partnership

Message Of The C.E.O

Silicon Technologies has a history of responsible business conduct. We strongly believe that real business success is not just about profits measured in numbers but it is also about how those numbers are achieved and how we can improve the overall efficiency and effectiveness of IT Solutions deployed at our valued customers. Our corporate strategy reflects our commitment to sustainable business practices and balancing growth and productivity.

Mobeen Ul Haq

mobeen@silicon.net.pk

Message Of The C.O.O

During the past years, we embarked upon a very successful expansion of our business. We have expanded our presence from only Karachi, to Lahore, Islamabad and Peshawar. We developed new partnerships, secured major projects and accomplished numerous prestigious achievements awards. I attribute our success to support provided by our valued customers, reliable vendors, and strategic partners and of course the dedicated employees to whom I am deeply grateful.

Asif Waheed Khan

asif@silicon.net.pk

TECHNOLOGIES

Our Team

Silicon's Key Personnel are experts who have an exceptional years of experience in the IT industry. They are the driving force behind our company's ability to continually deliver best services to our clients.

Our Expert Team strive to create a corporate culture in which our associates can experience challanging growth opportunities, and attain exceptional level of Customer Management & Relationship.

Our Solutions & Services

Data Center Design, Consultancy and Turn Key Solutions

Data Center Services help you plan, design and build optimized cost-effective data centers and facilities to achieve a lean, resilient and flexible infrastructure that can sustain growth, deliver business value, meet high availability demands of the customers.

Power Solutions

Full range of leading Power backup solutions, Industrial grade UPS, AVR, DC rectifiers, PDU.LTS/ATS, Solar PV solutions and batteries, Emerging power solutions have carved solar technology as the forefront in the modern world when it comes to energy

Virtualization/HCI/SDDC

We offer the most advanced solutions for Virtualization/HCI/SDDC for server, storage and network consolidation to reduce the TCO, maintain robust environment with high availability single point of management and monitoring.

Network Infrastructure & Security

All sort of network/infrastructure & security solutions according to customers needs based on new technologies & standards so that our customer gets best data performance for fast & reliable daily work.

Video Conferencing

As per todays Business needs, remote working is a necessity. Now its easy to connect your business, organization, group or team. Meet, share your screen, documents, gain valueable analytics and much more.

Our Solutions & Services

Industrial Automation

A single source for all your AI hardware from basic components like keyboards, rams, and storage to fanless Pc ,PPC, displays, portable computers to Industrial grade Networking and Media converters, Social cards, Rtu, etc.

Enterprise Computing Infrastructure/Storage

To effectively meet the overall enterprise business needs, Silicon provides planning & implimentation services for wide range of servers, storage, laptops, and desktop product for any environment.

Command & Control Solutions

Offering solutions for a variety of applications, such as Control rooms, NOC, SOC, SCADA. Video wall solutions are offered on turnkey basis which includes consultation, soluting designing, hardware components to deployment and training related services.

Security Surveillance

Silicon has significant skills on IP surveillance project planning and deployments, which is the most demanding requirement from any sector to overcome the environment's security risks.

Managed Services/Service Level Agreement

Silicon offers Service Level Agreements to valued customers for UPS, Servers, Networks, Surveillance, Data centers, Resident engineers, Laptops, Desktops, through our certified technical team.

Computing, Data Storage & Core Infrastructure

Lenovo is dedicated to transform customer's experience for how they interacts with the people around the world with the help of innovative technology. World renowned manufacturer of Laptops, Desktops, Servers, Storage and various Virtualization, Hyper converged and Active DataCenter Comprehensive Solutions.

Silicon is the Pioneer in introducing the Tape backup solutions in Pakistan. A global technology company that develops and manufactures hybrid cloud IT infrastructure and data protection solutions enabling businesses, large and small, to securely manage and protect their digital assets.

1. Standalone Tape Drive
2. Automation Tape Libraries
3. RDX (Rugged, Storage with Portability)

Veeam® is the leader in backup solutions that deliver Cloud Data Management™. Veeam provides a single platform for modernizing backup, accelerating hybrid cloud and securing your data. Solutions are simple to install and run, flexible enough to fit into any environment and always reliable.

Computing, Data Storage & Core Infrastructure

vmware believe that software has the power to unlock new possibilities for people and our planet. Softwares that form a digital foundation that powers the apps, services, and experiences transforming the world. Software Defined Data Center (SDDC), Servers & Network virtualization, Hyper-Converged Infrastructure, Desktop Virtualization (VDI) and various architecture optimization Software Solutions. VDI offers centralized desktop management, letting you configure and troubleshoot desktop operating systems without remote access or on-site visits. Users can access their applications and data from any device, anywhere, without the need to invest in expensive, high-powered client endpoint equipment. Sensitive data secure never leaves the server. VDI offers centralized desktop management, letting you configure and troubleshoot desktop operating systems without remote access or on-site visits. Users can access their applications and data from any device, anywhere, without the need to invest in expensive, high-powered client endpoint equipment. Sensitive data secure never leaves the server.

At Dell Technologies, we are innovation pioneers driving the digital revolution forward. Together, and as individuals, our passion and unique perspectives propel every idea, concept and solution we create. By embracing our differences and investing time in our diversity, our leaders foster a culture of innovation and inclusion that enables us to create technology that ensures widespread accessibility and impactful improvements to daily life. Leading is nothing new for us. That's why advancing sustainability, cultivating inclusion, transforming lives and upholding ethics and privacy are embedded in everything we do. Powered by a workforce that values and celebrates different backgrounds, we create solutions that harness and amplify technology in the most meaningful ways.

Industrial Automation

ADLINK is a global leader in edge computing with a mission to bring about a positive change in society and industry by connecting people, places and things with AI. Offerings include robust boards, real-time data acquisition solutions and application enablement for AIoT. Adlink serves vertical markets including manufacturing, communications, healthcare, military, energy, infotainment and transportation.

SINTRONES is a leading provider of in-vehicle computer solutions headquartered in Taiwan. We focus on research, design, and manufacturing of high-performance transportation systems that cater to the evolving needs of the global market.

MOXA, a company with over 30 years of experience in delivering Industrial grade Equipments to some of the sensitive Segments. It stands #1 for Serial device and #3 for Industrial Ethernet manufacturer globally.

EDGE CONNECTIVITY

- Serial Device Servers & Multiport Serial boards
- Industrial Ethernet Gateways
- Media Converters
- RTU Controllers
- Remote I/O

INDUSTRIAL COMPUTING

- Edge Computer
- Wireless Computer
- Display & Panel Computer

SAMSUNG

A company founded in 1938 once known for its top-of-the line display products, today stands as a leader in Display solutions and digital signage business. Reliability and Innovation, are two core reasons for its success. Today Samsung stands as No. 1 in global market share. With best picture quality and exceptional durability, Samsung digital signage displays elevate the conventional viewing experience, helping businesses deliver content that engages, informs and entertains.

TRICOLOR®

Tricolor is one of the leading Manufacturer for professional audio & visual products using the most advanced Image processing, transmission & codec technology. Offering a complete range of Video wall Controllers, Matrix switchers, AVOIP products, KVM switches, Signal extenders & related accessories. Adhering to the "Be Honorable, Be faithful" business philosophy, Tricolor is determined to become a respected world-class enterprise, bringing value to customer and society.

WINMATE

Founded in 1996, Winmate Inc. is a pioneer in rugged computing technology. Winmate has a strategic alliance of partners spanning across six continents, serving a global range of vertical markets, including Industrial manufacturing, field services, Oil and Gas, Marine, Military, Healthcare, Warehouse and transportation. In addition to their elegant and durable design, the industrial panel computers are also highly customizable. These devices can be configured to meet specific user requirements and come with a range of connectivity options, including Wi-Fi, Bluetooth, Ethernet, and USB. This makes them suitable for a wide range of applications, from factory automation to warehouse management and beyond.

Network & Security

Cisco Systems, Inc. is an American multinational technology conglomerate headquartered in San Jose, California, in the center of Silicon Valley. Cisco develops, manufactures and sells networking hardware, software, telecommunications equipment and other high-technology services and products. The Cisco networks has truly become the platform for providing one seamless, transparent customer experience. As a result, Cisco and Cisco technology is changing the way we work, live, play and learn.

Fortinet is a worldwide provider of network security appliances and a market leader in unified threat management (UTM). Fortinet products and subscription services provide broad, integrated and high-performance protection against dynamic security threats while simplifying the IT security infrastructure. Fortinet customers include enterprises, service providers and government entities worldwide, including the majority of the 2011 Fortune Global 100. Fortinet is headquartered in Sunnyvale, Calif with offices around the world.

Founded in 1986, D-Link is a global leader in the design, manufacture and marketing of advanced networking, broad-band, digital, voice and data communications solutions. D-Link's core competency is in Ethernet connectivity. A major contributor to D-Link success is their established and expanding network of global distribution and delivery channels that bring products to more than 100 countries every day every year for 20 years. D-Link surpassed the \$1 billion revenue milestone in 2005.

Network & Security

Aruba has repeatedly been recognized by third party analysts as a leader in Wi-Fi 6, switching, SD-Branch, and a visionary Data Center Networking. The world's largest companies rely on Aruba to provide a secure, AI-powered edge services platform that spans across campus, branch, data center and remote working environments for a single operational experience. Take advantage of our networking expertise through your entire journey from initial planning, design, and deployment to ongoing operations and optimization. You benefit from HPE Aruba Networking best practices, whether delivered direct from us or our enabled partners. Quickly reach the full performance, operational and security benefits through our packaged or custom QuickStart services. Ensure the highest levels of performance and security.

Zhejiang Dahua Technology Co., Ltd. (Dahua Technology) is a world-leading video-centric smart IoT solution and service provider. The company continues to explore emerging opportunities based on video IoT technologies and has already established business in machine vision, video conferencing systems, professional drones, electronic license plates, RFID, robotics, etc. Dahua Technology provides retailers innovative security infrastructure to help maximize profits while minimizing losses and expenses. Dahua solutions help stores analyze customer and store operation data, as well as prevent unnecessary loss and operating inefficiencies. We are proud of what we do and who we are. At Dahua Technology, you will be surrounded by a team that is dedicated, bright, and enthusiastic about both technology and security solutions. We are always trying to find new ways to improve our methodology, our operations, and raising the bar in our industry.

Software Solution

Microsoft is a name that does not need any introduction. A market leader that develops and manufactures products that gives us the best of both worlds, hardware and software in computing. With its broad range of solutions ranging from simple desktop based operating systems to solutions as extensive as providing complete unified communications experience, Microsoft has become a key player in the industry around which many other products revolve. Silicon Technologies has Gold Partnership status with Microsoft and we are recognized as being the highly credited licensing and solution provider, where we offer a comprehensive range of support for Microsoft based solutions and licensing on a turn-key level.

Symantec offers security software for companies and consumers that protects against viruses, detects attempted intrusions, reduces spam and filters unwanted content. The company's Norton Security and Life Lock Identity Theft Protection products help consumers protect their devices, identities, online privacy, and home networks. For commercial customers, Symantec's Enterprise products offer similar protections on a grander scale as well as others such as network security, cloud security and threat intelligence. The company counts as customers some 350,000 corporations and organizations and more than 50 million consumers.

SolarWinds is a network performance and systems monitoring software that enable businesses to identify, diagnose and solve critical networking and IT problems. SolarWinds software also improves troubleshooting and service levels that increase usability while minimizing downtime.

Software Solution

ESET began life as a pioneer of antivirus protection, creating award-winning threat detection software. Now, ESET's goal is to make sure that everybody can enjoy the breathtaking opportunities that technology offers. Today, Eset's security solutions allow businesses and consumers in more than 200 countries and territories to make the most out of the digital world. For three decades, Eset have been helping people to protect their digital worlds. From a small, dynamic company Eset have grown into a global brand with over 110 million users in 202 countries and territories. Many things have changed, but Eset's core aspirations, philosophy and values remain the same to help build a more secure digital world where everyone can truly Enjoy Safer Technology.

Kaspersky is a global cyber security company founded in 1997. Kaspersky's deep threat intelligence and security expertise is constantly transforming into innovative security solutions and services to protect businesses, critical infrastructure, governments and consumers around the globe. The company's comprehensive security portfolio includes leading endpoint protection and a number of specialized security solutions and services to fight sophisticated and evolving digital threats. Over 400 million users are protected by Kaspersky technologies and we help 250,000 corporate clients protect what matters most to them.

Trend Micro, a global cybersecurity leader, helps make the world safe for exchanging digital information. Fueled by decades of security expertise, global threat research, and continuous innovation, our cybersecurity platform protects 500,000+ organizations and 250+ million individuals across clouds, networks, devices, and endpoints. As a leader in cloud and enterprise cybersecurity, our platform delivers central visibility for better, faster detection and response and a powerful range of advanced threat defense techniques optimized for environments, like AWS, Microsoft, and Google.

UPS & Power Solutions

Vertiv Holdings LLC ("Vertiv"), a Platinum Equity portfolio company, and a global provider of critical digital infrastructure and continuity solutions, With operations in more than 130 countries, Vertiv is a global leader in delivering the hardware, software, analytics and ongoing services customers rely on to enable their vital applications to run continuously, perform optimally and grow with their business needs.

The company's portfolio of power, thermal and IT management along with cooling and IT infrastructure solutions and services that extend from the cloud to the edge of the network.

Data Center Solution Covers:

- Data Center Integrated Modular Solutions
- Thermal Management
- Air Handler & Chillers
- UPS System
- Power Distribution
- Racks & Containment
- Monitoring Control & Management

Vertiv Flagship Brands

NETSURE

Our Global Intelligently engineered DC power system deliver high availability, energy efficiency and scalability for the converged network.

Our Industry leading software gives customers and integrated view of operations across IT and facilities resources, enabling better decisions that save time and money.

The Vertiv™ Avocent® DSVIEW™ Solution is a family of IT management devices and software that provides solutions in edge, enterprise and engineering lab environments.

Liebert.

Our Global thermal management solutions are some of the world's most efficient and reliable power and cooling technologies.

Ensure continuous operations with full featured power solutions by Vertiv Geist Rack PDU. Protect your critical IT w/ Vertiv Geist Rack PDU.

E+I Engineering offer a complete energy management system for any size of project. All energy management systems are built to client's specifications and ensure compliance with all applicable standards and regulations.

UPS & Power Solutions

AVOCENT

Avocent and Cybex™ KVM switches and serial consoles offer seamless control over multiple IT devices, providing convenient, centralized access for efficient management of system data across various locations.

E+I ENGINEERING

E+I Engineering is a leading UK & Ireland electrical switchgear manufacturer with over 30 years of expertise, offering innovative integrated power solutions, comprehensive services, and unparalleled customer support.

NETSURE

To ensure data center availability and business continuity, the reliable operation of the rack power distribution unit (rPDU) is crucial for supporting dynamic functions in power, cooling, monitoring, and overall data center infrastructure management (DCIM).

LIEBERT

Liebert power and thermal management systems safeguard and adapt to evolving needs, ensuring uninterrupted access to critical applications and data in the core of your business.

GEIST

Ensure continuous operations with full featured power solutions by Vertiv Geist Rack PDU. Protect your critical IT w/ Vertiv Geist Rack PDU. Available in a wide variety of models.

KOTOHIRA Japan, established in 1993, is one of the oldest Industrial grade equipment manufacturer. Offering a variety of capacities in the Low/ High frequency UPC, Modular UPS, Home Invertors, Solar Invertors & Batteries.

UPS & Power Solutions

MATRIX NETWORK POWER builds the strongest and most durable data center infrastructure equipment available using the finest materials and state-of-the-art manufacturing processes. This quality and craftsmanship is complemented by a company culture that emphasizes flexibility and customer service. MATRIX NETWORK POWER continues to grow along with the IT industry, applying its knowledge and experience to deliver data center infrastructure products that specifically assemble the needs of our customers.

Ritar has been adhered to introduce and develop advanced technologies and processes, had set up Ritar Research Center, including 2 professors who have experience over 40 years in battery research, and over 50 research engineers. Adopted the world's most advanced production equipments and testing methods. Battery products have a long service life, high energy, Cadmium-free environmental protection and other features, also have got dozens of independent intellectual property rights of the patent invention. Ritar products are exported to more than 100 countries and regions all over the world.

TOTEN

TOTEN gradually achieves high-level management and operation in scientific work flow, and maintains the balanced development of scale, operational effectiveness and operational capacity-building. Our company including professional marketing, technology, stock, production and QC takes part in the customer's project from end to end. It makes sure the technical communication, sample setup, quality standard & delivery time to be solved promptly and correctly.

Successful Projects

Our Successful Projects

Pakistan Navy Karsaz:

Challenges:

Customer upgrading and relocating data center due to increased capacity. Seeks compact, integrated solution with cooling, monitoring, and management systems. Aisle containment gaining popularity over traditional data centers.

Solution:

Customer chose to deploy Vertiv™ SmartAisle™ module in new 14-rack data center with dedicated power, 2N+1 In Row cooling, DCIM monitoring, fire suppression, and VESDA detection. Also installed Vertiv™ thermal management and UPS systems in critical business units. Recognized value of integrated solutions.

Benifits:

Vertiv's modular and scalable solutions provide room for future expansion. Advanced technology and integrated approach offer infrastructure on demand with quick deployment, configuration, and low operating costs, ensuring customer success.

Dubai Port World:

Challenges:

DP World upgrading existing data center and renovating Head Office server room to meet standards, enable 24/7 remote monitoring, enhance security, improve work efficiency, and manage manufacturing as per demand and supply.

Solution:

Data center has 8 racks with Cold Aisle containment. 2x Inrow (N+1) precision cooling with dual backup power sources. NOC, Manager Room, IT staff with monitoring system. NOVEC Fire Suppression and Detection System deployed.

Benifits:

24/7 operational environment for data security, quick disaster recovery plans, low utility cost, high efficiency with cold aisle containment, ASHRAE recommended temp/humidity levels, and reduced Total Cost of Ownership.

Our Successful Projects

Peshawar Institute of Cardiology:

Challenges:

PIC wanted a reliable, secure, and easy-to-manage data center with high operating efficiency, utilizing minimum footprint with 2N path redundancy. The solution should meet TIA-942A/B standards and house their IT infrastructure and critical operating system with cooling, UPS, and monitoring, enabling 24/7 operation.

Solution:

The smart small data center solution is a new generation with low PUE. It includes integrated PDU, UPS, monitoring, cooling, and rack system within a comprehensive rack to save space. The solution also allows for future expansion with additional IT racks.

Benifits:

Benefits of the solution include contained aisle for efficient airflow separation, no need for room renovation, power management and protection, real-time monitoring via mobile apps and centralized monitoring, and prefabricated components.

Pakistan Navy South (DCiM):

Challenges:

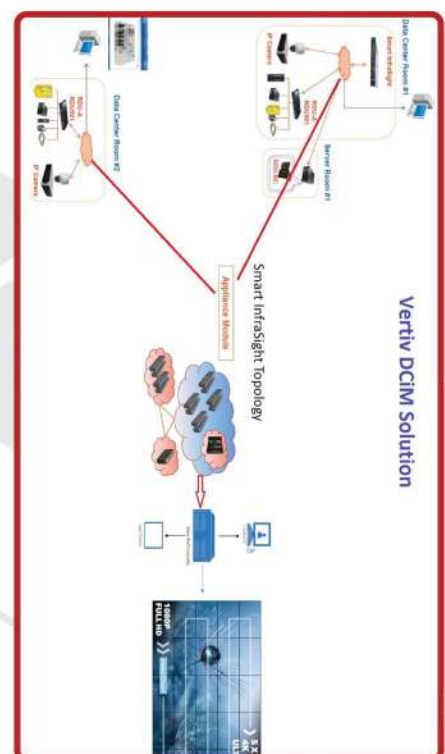

PN seeks to reduce costs and challenges of monitoring distributed IT infrastructure by managing it centrally. They require a reliable, secure, and easy-to-use DCiM solution to monitor environment, physical security, and power issues across multiple exchange sites.

Solution:

Silicon Technologies deployed Vertiv's Next-gen solution platform for centralized monitoring of 15 telecom sites. The solution includes real-time PUE, automated IT server shutdown/startup, thermal management, environmental parameters, physical security, 3D data center visualization, and premium infrastructure gateway appliance.

Benifits:

Smart InfraSight offers easy and centralized monitoring for distributed IT infrastructure. Asset auditing, access control, and environment optimization increase efficiency and ROI. Silicon Technologies is proud to be a key contributor.

Our Successful Projects

Cisco Projects:

Hascol Patroleum:

Hascol Petroleum upgrades WAN with intelligent networking and converged Data Center, Access Switching, and Wireless networks for departments.

Silicon Tech uses Cisco IS 4000, Nexus 9300, SMB switch, 9800 WLC, and C9100 AP.

Bahria University Karachi Campus:

BUKC needs network infrastructure and active equipment for additional floor at BESEAS (Bahria School of Engineering and Applied Science).

Silicon Technologies uses Cisco Nexus C3000 and C1000 Series with 10G backbone for latest switching technology.

Friesland Campina Anglo Pakistan:

Upgrade Friesland Campina Engro Pakistan's WAN, LAN, and video conferencing infrastructure for improved communication.

Silicon Technologies upgraded WAN with ISR4300, core layer with Nexus 9300, access with WS-C2960L, and VC KIT Plus.

Fortinet Projects:

PNS Karsaz:

PNS Karsaz needed NGFW for network security with advanced capabilities, including application control and intrusion prevention.

Silicon Technologies installed Fortinet 1000D NGFW, following client needs and industry standards.

Imtiaz:

IMTIAZ STORES sought high-availability Edge Firewall for seamless SD-WAN implementation across branches.

Silicon Technologies offers FortiGate 601F Firewall Services, emphasizing design, supply, deployment, and high availability.

Bahria Town:

Bahria Town needed a WAF to secure web apps/APIs, and SD-WAN with NGFW for scalable, affordable, and easy deployment.

Silicon Technologies installed Fortinet 400E WAF and Fortigate 100F UTM.

Our Successful Projects

D-link Projects:

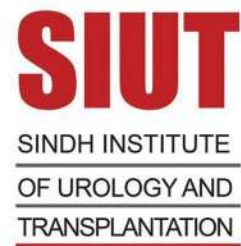

Interloop:

Silicon Technologies, successfully deployed a range of D-Link products at Interloop, enhancing their network infrastructure. These D-Link solutions are poised to optimize connectivity and support Interloop's operational needs, ensuring seamless and reliable communication within the organization.

SUIT:

Silicon Technologies, has successfully deployed a range of D-Link products at the SIUT (Sindh Institute of Urology and Transplantation). These high-performance networking solutions enhance connectivity and provide reliable infrastructure support to optimize SIUT's healthcare services and operations.

Habib Metro:

Silicon Technologies, has successfully deployed a range of D-Link products at Habib Metro. This implementation promises to enhance connectivity and network performance, ensuring a seamless and efficient IT infrastructure for the organization.

Dahua Projects:

Imtiaz:

Silicon Technologies, has successfully deployed a range of Dahua products at Imtiaz. This state-of-the-art security and surveillance solution ensures enhanced safety and efficiency for Imtiaz, further reinforcing their commitment to top-tier technology solutions.

LuckyOne Tower:

Silicon Technologies, has successfully deployed cutting-edge Dahua products at LuckyOne Tower. This implementation promises advanced security and surveillance solutions to enhance the safety and efficiency of the facility.

Silicon Expo 2022-23

SiliconExpo is an event organized in Karachi, Lahore & Islamabad by Silicon Technologies. This expo serves as a platform to showcase the latest and most innovative products and solutions from various technology partners in the industry. Some prominent partners featured in the event include Vertiv, Dahua, Dlink, Cisco, Fortinet, Eset, and many more.

During SiliconExpo, attendees can explore various cutting-edge technologies and solutions, making it an ideal gathering for IT professionals, businesses, and technology enthusiasts. The event typically includes product demonstrations, hands-on experiences, workshops, and informative seminars on the latest trends and developments in the IT sector.

Silicon Appreciation Awards 2022

Silicon Technologies held an awards ceremony to recognize and honor outstanding employee achievements, boosting morale and promoting continued excellence.

The employees had a great time at Silicon Appreciation Awards 2022, enjoying the recognition of their hard work and achievements.

The CEO addressed the employees, expressing gratitude and appreciation for the employees' valuable contributions.

Training Sessions 2022

Silicon Technologies conducted training for Pakistan Navy of (Data Center operations). All the participants learned and enjoyed the ultimate experience and gained relevant area knowledge and expertise.

All the participants learned, enjoyed the ultimate experience, and gained relevant area knowledge and expertise. The engaging session was highly appreciated and the active participation of all the members made it worthwhile!

Knowledge is power and knowledge shared is power multiplied. Silicon Technologies organized a two days training session of ITSM Foundation for our valued customers in collaboration with Dahua at Pc Hotel Karachi.

Our Partner Events

Silicon Technologies successfully organized the Vertiv Channel Partner event for our business partners where modern technologies related to power management solutions and data center solutions were presented and discussed.

Silicon Technologies conducts a Dlink Channel partner event at Nishat Hall Lahore. Thanks to all our valued customers for taking their precious time for this event.

Silicon Technologies conducts a Vertiv Channel Partner Event at Ramada Hotel Lahore. Thanks to all our valued customers for taking their precious time for this event.

SUPPLY CHAIN & INVENTORY

Warehouse is one of the key factors for the growth of businesses but, in the IT industry, this setup is highly risky & hard to manage due to the abrupt growth in IT technology day by day.

Our warehouse is located in Karachi & comprises over 16,000 sq/ft, well managed by the skilled & fully trained team of 24 co-workers, equipped with all necessary tools, vehicles & logistic facilities.
