

COMPANY PROFILE

SILICON ENTERPRISE SOLUTIONS (PVT) LTD.
Transforming Technologies Together

www.silicon.net.pk

Providing Next Generation Technology Solutions.

**DATA CENTER DESIGN, CONSULTANCY
& TURNKEY SOLUTIONS**

INDUSTRIAL AUTOMATION

POWER SOLUTIONS

**ENTERPRISE COMPUTING INFRASTRUCTURE
/ STORAGE**

VIRTUALIZATION / HCI SOLUTIONS

VIDEO WALL SOLUTIONS

**NETWORK INFRASTRUCTURE
& SECURITY SOLUTIONS**

SECURITY SURVEILLANCE

VIDEO CONFERENCING SOLUTIONS

**MANAGED SERVICES
& SERVICE LEVEL AGREEMENT**

About Us

SILICON ENTERPRISE SOLUTIONS, one of the leading ICT Organization engaged in addressing the needs of the Information Technology and Industrial Automation. Working with a firm conviction and determination for the advancement of IT Industry by joining hands with the leading global partners.

Foster Technological Innovation,
Adaptation & Deployment

Persuing Excellence in
Infrastructure Transformation

Integrity, Customer Satisfaction,
Continual Improvement,
Transparency, Partnership

Message Of The C.E.O

Silicon Enterprise Solutions has a history of responsible business conduct. We strongly believe that real business success is not just about profits measured in numbers but it is also about how those numbers are achieved and how we can improve the overall efficiency and effectiveness of IT Solutions deployed at our valued customers. Our corporate strategy reflects our commitment to sustainable business practices and balancing growth and productivity.

Mobeen Ul Haq

mobeen@silicon.net.pk

Message Of The C.O.O

During the past years, we embarked upon a very successful expansion of our business. We have expanded our presence from only Karachi, to Lahore, Islamabad and Peshawar. We developed new partnerships, secured major projects and accomplished numerous prestigious achievements awards. I attribute our success to support provided by our valued customers, reliable vendors, and strategic partners and of course the dedicated employees to whom I am deeply grateful.

Asif Waheed Khan

asif@silicon.net.pk

TECHNOLOGIES

Our Team

Silicon's Key Personnel are experts who have an exceptional years of experience in the IT industry. They are the driving force behind our company's ability to continually deliver best services to our clients.

Our Expert Team strive to create a corporate culture in which our associates can experience challenging growth opportunities, and attain exceptional level of Customer Management & Relationship.

Solutions & Services

Data Center Design, Consultancy and Turn Key Solutions

Data Center Services help you plan, design and build optimized cost-effective data centers and facilities to achieve a lean, resilient and flexible infrastructure that can sustain growth, deliver business value, meet high availability demands of the customers.

Power Solutions

Full range of leading Power backup solutions, Industrial grade UPS, AVR, DC rectifiers, PDU.LTS/ATS, Solar PV solutions and batteries, Emerging power solutions have carved solar technology as the forefront in the modern world when it comes to energy

Virtualization/HCI/SDDC

We offer the most advanced solutions for Virtualization/HCI/SDDC for server, storage and network consolidation to reduce the TCO, maintain robust environment with high availability single point of management and monitoring.

Network Infrastructure & Security

All sort of network/infrastructure & security solutions according to customers needs based on new technologies & standards so that our customer gets best data performance for fast & reliable daily work.

Video Conferencing

As per todays Business needs, remote working is a necessity. Now its easy to connect your business, organization, group or team. Meet, share your screen, documents, gain valuable analytics and much more.

Solutions & Services

Industrial Automation

A single source for all your AI hardware from basic components like keyboards, rams, and storage to fanless Pc ,PPC, displays, portable computers to Industrial grade Networking and Media converters, Social cards, Rtu, etc.

Enterprise Computing Infrastructure/Storage

To effectively meet the overall enterprise business needs, Silicon provides planning & implimentation services for wide range of servers, storage, laptops, and desktop product for any environment.

Command & Control Solutions

Offering solutions for a variety of applications, such as Control rooms, NOC, SOC, SCADA. Video wall solutions are offered on turnkey basis which includes consultation, soluting designing, hardware components to deployment and training related services.

Security Surveillance

Silicon has significant skills on IP surveillance project planning and deployments, which is the most demanding requirement from any sector to overcome the environment's security risks.

Managed Services/Service Level Agreement

Silicon offers Service Level Agreements to valued customers for UPS, Servers, Networks, Surveillance, Data centers, Resident engineers, Laptops, Desktops, through our certified technical team.

Computing, Data Storage & Core Infrastructure

lenovo

Lenovo is dedicated to transform customer's experience for how they interacts with the people around the world with the help of innovative technology. World renowned manufacturer of Laptops, Desktops, Servers, Storage and various Virtualization, Hyper converged and Active DataCenter Comprehensive Solutions.

VEEAM

Veeam® is the leader in backup solutions that deliver Cloud Data Management™. Veeam provides a single platform for modernizing backup, accelerating hybrid cloud and securing your data. Solutions are simple to install and run, flexible enough to fit into any environment and always reliable.

DURABOOK

a globally recognized brand specializing in rugged laptops and tablets built for professionals working in demanding environments. Designed with military-grade durability, Durabook devices combine powerful performance, reliability, and portability to withstand extreme conditions such as heat, cold, dust, shock, and vibration.

Computing, Data Storage & Core Infrastructure

At Dell Technologies, we are innovation pioneers driving the digital revolution forward. Together, and as individuals, our passion and unique perspectives propel every idea, concept and solution we create. By embracing our differences and investing time in our diversity, our leaders foster a culture of innovation and inclusion that enables us to create technology that ensures widespread accessibility and impactful improvements to daily life. Leading is nothing new for us.

Veritas Technologies is a global leader in data protection and information management solutions. It helps organizations secure, manage, and recover data across on-premises, cloud, and hybrid environments.

The company is widely known for its powerful backup and recovery solutions like NetBackup and Backup Exec. Veritas enables businesses to ensure high availability and minimize downtime during disruptions.

Industrial Automation

ADLINK is a global leader in edge computing with a mission to bring about a positive change in society and industry by connecting people, places and things with AI. Offerings include robust boards, real-time data acquisition solutions and application enablement for AIoT. Adlink serves vertical markets including manufacturing, communications, healthcare, military, energy, infotainment and transportation.

MOXA, a company with over 30 years of experience in delivering Industrial grade Equipments to some of the sensitive Segments. It stands #1 for Serial device and #3 for Industrial Ethernet manufacturer globally.

EDGE CONNECTIVITY

- Serial Device Servers & Multiport Serial boards
- Industrial Ethernet Gateways
- Media Converters
- RTU Controllers
- Remote I/O

INDUSTRIAL COMPUTING

- Edge Computer
- Wireless Computer
- Display & Panel Computer

Industrial Automation

SINTRONES Technology Corp. is a leading provider of embedded computing and edge AI solutions. The company specializes in rugged, high-performance systems for industrial and automotive applications. SINTRONES products are widely used in AIoT, smart transportation, and surveillance systems. Their solutions support NVIDIA platforms for advanced AI and deep learning capabilities. They offer in-vehicle computers, embedded GPUs, and edge AI systems. SINTRONES focuses on delivering fanless, durable, and compact designs for harsh environments.

Winmate Inc. is a global manufacturer of rugged computing and industrial display solutions. The company provides devices designed for harsh and demanding environments. Winmate's portfolio includes rugged tablets, panel PCs, industrial displays, and embedded systems. Its products are widely used in defense, marine, healthcare, logistics, and field services.

Winmate focuses on durability, water/dust resistance, and shock protection. Many devices meet military-grade and industrial certifications.

Network & Security

FORTINET[®]

Fortinet is a worldwide provider of network security appliances and a market leader in unified threat management (UTM). Fortinet products and subscription services provide broad, integrated and high-performance protection against dynamic security threats while simplifying the IT security infrastructure. Fortinet customers include enterprises, service providers and government entities worldwide, including the majority of the 2011 Fortune Global 100. Fortinet is headquartered in Sunnyvale, California with offices around the world.

D-Link[®] **Building Networks for People**

Founded in 1986, D-Link is a global leader in the design, manufacture and marketing of advanced networking, broad-band, digital, voice and data communications solutions. D-Link's core competency is in Ethernet connectivity. A major contributor to D-Link success is their established and expanding network of global distribution and delivery channels that bring products to more than 100 countries every day every year for 20 years. D-Link surpassed the \$1 billion revenue milestone in 2005.

Network & Security

Zhejiang Dahua Technology Co., Ltd. (Dahua Technology) is a world-leading video-centric smart IoT solution and service provider. The company continues to explore emerging opportunities based on video IoT technologies and has already established business in machine vision, video conferencing systems, professional drones, electronic license plates, RFID, robotics, etc. Dahua Technology provides retailers innovative security infrastructure to help maximize profits while minimizing losses and expenses. Dahua solutions help stores analyze customer and store operation data, as well as prevent unnecessary loss and operating inefficiencies. We are proud of what we do and who we are.

Cisco Systems, Inc. is an American multinational technology conglomerate headquartered in San Jose, California, in the center of Silicon Valley. Cisco develops, manufactures and sells networking hardware, software, telecommunications equipment and other high-technology services and products. The Cisco networks has truly become the platform for providing one seamless, transparent customer experience. As a result, Cisco and Cisco technology is changing the way we work, live, play and learn.

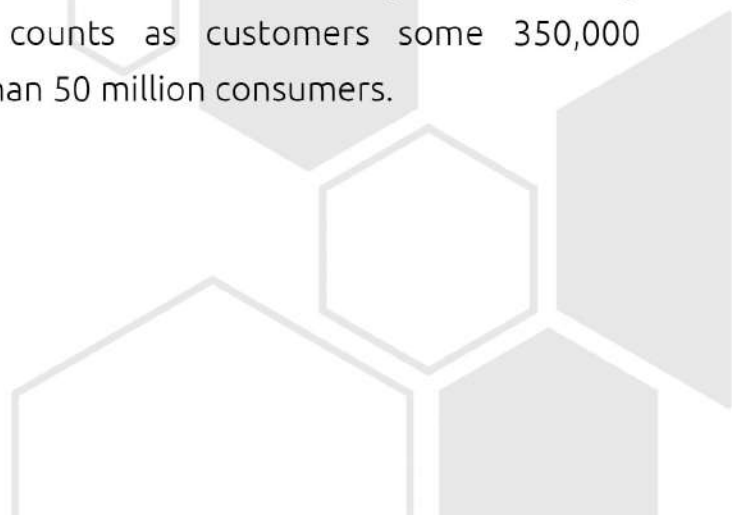

Software Solution

Microsoft is a name that does not need any introduction. A market leader that develops and manufactures products that gives us the best of both worlds, hardware and software in computing. With its broad range of solutions ranging from simple desktop based operating systems to solutions as extensive as providing complete unified communications experience, Microsoft has become a key player in the industry around which many other products revolve. Silicon Technologies has Gold Partnership status with Microsoft and we are recognized as being the highly credited licensing and solution provider, where we offer a comprehensive range of support for Microsoft based solutions and licensing on a turn-key level.

Symantec offers security software for companies and consumers that protects against viruses, detects attempted intrusions, reduces spam and filters unwanted content. The company's Norton Security and Life Lock Identity Theft Protection products help consumers protect their devices, identities, online privacy, and home networks. For commercial customers, Symantec's Enterprise products offer similar protections on a grander scale as well as others such as network security, cloud security and threat intelligence. The company counts as customers some 350,000 corporations and organizations and more than 50 million consumers.

Software Solution

ESET began life as a pioneer of antivirus protection, creating award-winning threat detection software. Now, ESET's goal is to make sure that everybody can enjoy the breathtaking opportunities that technology offers. Today, Eset's security solutions allow businesses and consumers in more than 200 countries and territories to make the most out of the digital world. For three decades, Eset have been helping people to protect their digital worlds. From a small, dynamic company Eset have grown into a global brand with over 110 million users in 202 countries and territories.

Kaspersky is a global cyber security company founded in 1997. Kaspersky's deep threat intelligence and security expertise is constantly transforming into innovative security solutions and services to protect businesses, critica infrastructure, governments and consumers around the globe. The company's comprehensive security portfolio includes leading endpoint protection and a number of specialized security solutions and services to fight sophisticated and evolving digital threats. Over 400 million users are protected by Kaspersky technologies and we help 250,000 corporate clients protect what matters most to them.

SANGFOR

A leading global provider of IT infrastructure and cybersecurity solutions. Sangfor specializes in delivering innovative, reliable, and cost-effective technologies that empower businesses to enhance security, improve efficiency, and accelerate digital transformation.

UPS & Power Solutions

Vertiv Holdings LLC ("Vertiv"), a Platinum Equity portfolio company, and a global provider of critical digital infrastructure and continuity solutions, With operations in more than 130 countries, Vertiv is a global leader in delivering the hardware, software, analytics and ongoing services customers rely on to enable their vital applications to run continuously, perform optimally and grow with their business needs.

The company's portfolio of power, thermal and IT management along with cooling and IT infrastructure solutions and services that extend from the cloud to the edge of the network.

Data Center Solution Covers:

- Data Center Integrated Modular Solutions
- Air Handler & Chillers
- Power Distribution
- Monitoring Control & Management
- Thermal Management
- UPS System
- Racks & Containment

Vertiv Flagship Brands

NETSURE

Our Global Intelligently engineered DC power system deliver high availability, energy efficiency and scalability for the converged network.

Our Industry leading software gives customers and integrated view of operations across IT and facilities resources, enabling better decisions that save time and money.

The Vertiv™ Avocent® DSView™ Solution is a family of IT management devices and software that provides solutions in edge, enterprise and engineering lab environments.

Liebert.

Our Global thermal management solutions are some of the world's most efficient and reliable power and cooling technologies.

Ensure continuous operations with full featured power solutions by Vertiv Geist Rack PDU. Protect your critical IT w/ Vertiv Geist Rack PDU.

E+ Engineering offer a complete energy management system for any size of project. All energy management systems are built to client's specifications and ensure compliance with all applicable standards and regulations.

UPS & Power Solutions

AVOCENT

Avocent and Cybex™ KVM switches and serial consoles offer seamless control over multiple IT devices, providing convenient, centralized access for efficient management of system data across various locations.

E+I ENGINEERING

E+I Engineering is a leading UK & Ireland electrical switchgear manufacturer with over 30 years of expertise, offering innovative integrated power solutions, comprehensive services, and unparalleled customer support.

NETSURE

To ensure data center availability and business continuity, the reliable operation of the rack power distribution unit (rPDU) is crucial for supporting dynamic functions in power, cooling, monitoring, and overall data center infrastructure management (DCIM).

LIEBERT

Liebert power and thermal management systems safeguard and adapt to evolving needs, ensuring uninterrupted access to critical applications and data in the core of your business.

GEIST

Ensure continuous operations with full featured power solutions by Vertiv Geist Rack PDU. Protect your critical IT w/ Vertiv Geist Rack PDU. Available in a wide variety of models.

TOTEN

TOTEN gradually achieves high-level management and operation in scientific work flow, and maintains the balanced development of scale, operational effectiveness and operational capacity-building. Our company including professional marketing, technology, stock, production and QC takes part in the customer's project from end to end. It makes sure the technical communication, sample setup, quality standard & delivery time to be solved promptly and correctly.

UPS & Power Solutions

Ritar has been adhered to introduce and develop advanced technologies and processes, had set up Ritar Research Center, including 2 professors who have experience over 40 years in battery research, and over 50 research engineers. Adopted the world's most advanced production equipments and testing methods. Battery products have a long service life, high energy, Cadmium-free environmental protection and other features

UPS Solutions

Power your operations with confidence through Energia Max UPS systems, designed to deliver uninterrupted performance when it matters most. Built with advanced technology and high efficiency, our UPS solutions ensure stable power backup, protect critical equipment from outages and voltage fluctuations, and support seamless business continuity. Whether for corporate, industrial, or IT environments, Energia Max UPS offers reliability, scalability, and peace of mind.

Rack Solutions

Organize, secure, and optimize your IT infrastructure with Energia Max racks, engineered for durability and smart space management. Designed to support a wide range of networking and power equipment, these racks provide superior airflow, easy cable management, and robust structural integrity. From data centers to office setups, Energia Max racks ensure a clean, efficient, and professional environment for your critical systems.

Successful Projects

Successful Projects

Data Center Projects

CMPAK ZONG

Deployment & Upgrading of Data Center Solutions – Nationwide

- 2MW Modular UPS with Lithium-ion Batteries
- 248 Tonnage CRAC units for new sites
- 137 Tonnage CRAC units for existing sites
- Centralized Monitoring of CRAC Solution

SECP

Nationwide Data Center Revamp & Upgrade

- Transition from traditional to modern, optimized data center solutions
- Successfully executed within a live environment with zero disruption

Atlas Group

Inverter-Based Cooling Solution

- 135kW inverter-based cooling project deployed at Primary and Disaster Recovery sites

Successful Projects

Data Center Projects

SNGPL & SSGC

CRAC Replacement

- 240kW CRAC units replaced to improve cooling reliability and efficiency

Lotte Akhtar Beverages LOTTE

UPS Backup + Precision Cooling

- 1.6MW UPS Backup system
- Precision cooling to maintain desired temperature and humidity
- Objective: Protect production during WAPDA supply interruptions
- Result: Reduced power losses after UPS installation

Transworld

Telecom Facility Solution

- Deployment of Rectifiers, Precision Cooling, and Modular UPS systems

Dynea Pakistan

Power Management Solution

- 300kVA Backup UPS deployed to ensure uninterrupted production

Successful Projects

Cisco Projects:

Chevron

Enterprise Network Infrastructure Revamp.
Implemented Cisco core, distribution, and access switches for high performance, scalability, and reliability.

College of Physicians and Surgeons Pakistan

Network and Wireless LAN Infrastructure Upgradation
Upgraded Network and Wireless LAN infrastructure, ensuring reliable connectivity and enhanced performance, especially supporting students during examinations.

REKO DIQ

Enterprise Connectivity Project
Deployed a robust network infrastructure ensuring reliable connectivity, scalability, and high-performance operations across the environment.

Fortinet Projects:

Fauji Foods

Network Security Upgradation
Deployed complete IT and CCTV infrastructure with Fortinet Security Fabric, covering firewall, WLAN, and core/access network layers for secure and seamless connectivity.

Atlas Group

Perimeter Edge Firewall Upgradation
Upgraded perimeter firewalls across multiple sites, deploying 10+ appliances for enhanced security and performance.

Liberty Mills

Perimeter Edge Firewall
Successfully implemented the Perimeter Edge Firewall. This integrated approach ensures enhanced security and seamless connectivity across the entire environment.

Successful Projects

D-link Projects:

SABS University Jamshoro

Managed Wired/Wireless/Telephony Infrastructure
Deployed complete Wi-Fi 06 with WLC Deployment and Switching Backplanes. Implemented IP Telephony with IP PBX Exchange with 10G Fiber Backbone Infrastructure Integration.

Habib Metro Bank

Managed Digitalized SIP Based HOT Line
Installed Enterprise Grade IP PBX Exchange in High Availability with Active-Passive Cluster, with deployment of 600+ D-Link IP Telephony Deployment as "Hot Line" at HMB ATM booth nationwide.

Soorty Enterprises

Managed Wired/Wireless Infrastructure
Deployed complete Wi-Fi 06 with WLC Deployment and Switching Backplanes.
End-to-end Fiber Deployment with 1G Fiber Backbone Infrastructure Integration.

Air University - Karachi Campus

Campus LAN Infrastructure
Successful execution of comprehensive LAN Infrastructure Readiness aimed at enhancing connectivity and strengthening the institution's network backbone with high-speed, reliable, and scalable network connectivity to support both academic and administrative operations.

HABIBMETRO

SOORTY

World Of Dream

Dahua Projects:

INDUS HOSPITAL & HEALTH NETWORK

Advance Security Monitoring System
• 2500+ AI-based cameras & storage
• Command & Control Center

SALIM HABIB UNIVERSITY

Smart Education System
• Interactive Smart Screens
• Lecture broadcast & Digital Displays

LUCKY ONE MALL

AI-Based Surveillance System
• 400+ AI-enabled cameras & storage
• Facial Recognition, Heat mapping, People Counting, Visitor Management & ANPR.
• Smart building Solution (Elevator control system, Video door phones, Access control system).
• Command and control Center.

IMTIAZ SUPER MARKET

AI-Based Security Surveillance System
• Security Surveillance
• Facial Recognition, Heat Mapping

Silicon Expo 2024-25

SiliconExpo is an event organized in Karachi, Lahore & Islamabad by Silicon Enterprise. This expo serves as a platform to showcase the latest and most innovative products and solutions from various technology partners in the industry. Some prominent partners featured in the event include Vertiv, Dahua, Dlink, Cisco, Fortinet, Eset, and many more.

During SiliconExpo, attendees can explore various cutting-edge technologies and solutions, making it an ideal gathering for IT professionals, businesses, and technology enthusiasts. The event typically includes product demonstrations, hands-on experiences, workshops, and informative seminars on the latest trends and developments in the IT sector.

Silicon Appreciation Awards 2025

Silicon Enterprise held an awards ceremony to recognize and honor outstanding employee achievements, boosting morale and promoting continued excellence.

The employees had a great time at Silicon Appreciation Awards 2025, enjoying the recognition of their hard work and achievements.

The CEO addressed the employees, expressing gratitude and appreciation for the employees' valuable contributions.

Projects Sign-off Ceremonies

A proud moment for Silicon Enterprise Solutions as we officially completed and signed off the "Integrated Connectivity Infrastructure Project" at PSPC.

Silicon Enterprise Solutions proudly marked the official sign-off with SECP for the Data Centre Revamp Project in Lahore and Islamabad

Silicon Enterprise Solutions is proud to announce the formal sign-off of the "Surveillance Project – Indus Hospital & Health Network".

Partner Events

Silicon Enterprise successfully organized the Vertiv Channel Partner event for our business partners where modern technologies related to power management solutions and data center solutions were presented and discussed.

Silicon Enterprise conducts a Dlink Channel partner event at Nishat Hall Lahore. Thanks to all our valued customers for taking their precious time for this event.

Silicon Enterprise conducts a Vertiv Channel Partner Event at Ramada Hotel Lahore. Thanks to all our valued customers for taking their precious time for this event.

Logistics & Supply Chain

Warehouse is one of the key factors for the growth of businesses but, in the IT industry, this setup is highly risky & hard to manage due to the abrupt growth in IT technology day by day.

Our warehouse is located in Karachi & comprises over 16,000 sq/ft, well managed by the skilled & fully trained team of 24 co-workers, equipped with all necessary tools, vehicles & logistic facilities.
